

OCTAVIUS FINANCE

About Us

Octavius Finance is a boutique, specialist headhunting firm operating in global financial markets. Our aim is to deliver transparency in the recruitment process, providing a common sense, consultative approach to both candidates and clients, operating with honesty and integrity.

Consultants at Octavius are able to demonstrate the highest level of market and technical understanding. We know that market knowledge takes time to develop and have witnessed high staff turnover in many of our competitors resulting in a negative impact on performance. We pride ourselves on our staff retention and the added benefit of continuity we offer our clients.

We focus on mid-senior level appointments primarily within:

Buy Side

Asset management
Hedge Funds/Alternative investments
Quantitative Portfolio management

Research

Economics
Macro Research and Strategy
Commodities
Bottom up/Fundamental (credit and equities)

Quantitative investment strategies (Client/Portfolio strategies)
Index Research

Data Science

Quantitative Trading

Systematic, med-high frequency,
Electronic

Data Science

Data Engineering, Machine Learning Engineers,
Data analytics, Alternative Data, Big Data, GIS, Social Networks.

Octavius Internship Scheme

Since the start of 2018 Octavius has been introducing students and recent graduates to our clients as part of our complementary services.

As a recruiter we get many calls from graduates looking for assistance in entering their chosen area of specialism, however the majority of our mandates are for experienced level candidates or those with a niche set of skills.

It's logical that a firm does not want to pay a recruiter for a candidate that has no experience as there is a risk that the candidate either may not work out of alternatively, that the need for the hire cannot be sustained.

We have seen that a graduate with financial industry internship experience is much more successful when making the move into a full time position. In addition, we understand that smaller firms may need some extra assistance but often don't have time to recruit themselves or there may be budget restrictions.

As a result, we launched the internship scheme which helps connect students and graduates to our clients without the incurrance of recruitment fees*.

We work in consultation with our clients who are looking for interns and recent graduates with a specific set of skills from top universities. This offers us a unique perspective and experience in the market, a view point which enables us to clearly identify and develop potential future leaders and also advise junior candidates on what placements could help them reach their long term goals.

How do I get involved?

We have a vast network of candidates from top global universities.

If you think you may want to take on an intern please ask your recruiter about the scheme and we will be happy to assist.

**fees will apply to candidates later offered full time positions.*
